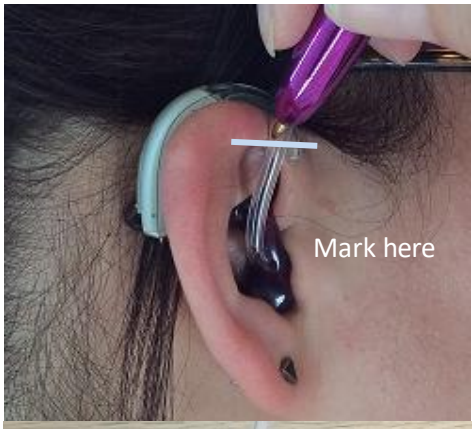
How to measure your new tube

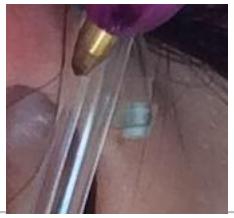
1

Either place an old tube next to the new tube and mark a line. (image shows pen marking a line on tube)

Or



Place it in your ear and have someone mark it for you where the tube and hearing aid over lap by a small amount. (image shows pen marking a line on tube)



3

Cut the tubing where you have marked it and then push it onto the hearing aid. (image shows scissors cutting tube and images below show new tube being inserted to aid)

4
