Please note:

- Rota contacts are listed above to facilitate obtaining rotas. If trainees experience difficulties they should contact the Medical HR. Given that trainee allocations can be adjusted by NIMDTA throughout June and July, although not intended this can result in delays when producing some rotas for in-coming doctors.
- Banding supplements indicated are those recognised by the Board Liaison Group and may not take account of temporary changes resulting from monitoring, service changes and/or staff in post.
- All rotas are subject to change through agreement with post holders.
- Banding supplements indicated only apply to those who participate on the out of hour's rota in full.
- Less than full time trainees should liaise with the Medical HR regarding banding supplements
